EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bala Sundararajan on 27 December 2005.

The application has been amended as follows:

Claims 8-14 are cancelled.

2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance for claims 1-7 is that applicant's claimed invention includes an apparatus for ejecting droplets where at an operating temperature, the actuator unit receives a stress of - 40MPa to 10MPa in a direction substantially parallel to a face thereof bonded to the passage unit. It is this limitation, expressed in the claimed combination not found, taught, or suggested in the prior art, that makes these claims allowable over the prior art.

The examiner makes of record that the previous specification objection dated 1 June 2005 is withdrawn in view of applicant's remarks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2853

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
